

THATCHER COMPANY – *Think Safety, Act Safely*

Thatcher Company is a diversified chemical manufacturer and distributor. The company was founded in 1967 and has grown to be a major chemical supplier and distributor in the United States. Today, Thatcher Company employs more than 200 people, with headquarters located on 25 acres in the industrial area of Salt Lake City, Utah. Operating in a number of locations nationwide, Thatcher's diversification, coupled with ever broadening product offerings, allows us to respond to the changing needs of our customers and the marketplace.

Job Description

Project /Process Engineer

This position requires sound engineering rigor, the ability to make empirical and logical decisions, interface well with multiple stake holders, balance various priorities and drive projects/assignments to completion on time and within budget. Demonstrated professional aptitudes along with strong verbal and written communication. Will require supervision of various contractors and sub-contractors and the coordination of their activities in an effective and efficient manner. May require supervision of maintenance personnel and the ability to implement and maintain formal preventive and predictive maintenance programs. It's all about execution and having an impact on the plant/building processes and company organization.

Initial assignments would include project oversight of building expansion and processes in regard to pharmaceutical products.

Desired Qualifications

- BS/MS Chemical, Mechanical, Civil, Manufacturing or other applicable engineering discipline. Engineering technology degrees acceptable.
- Minimum of eight (8) years of successful experience as an engineer in project management and establishing manufacturing processes.
- Some knowledge of chemical engineering and chemical processes in a manufacturing environment.
- Prior experience in a chemical, petro-chemical or pharmaceutical manufacturing environment.
- Detail oriented. Hands-on experience in a process engineering capacity.
- Working knowledge of and experience in the application of lean manufacturing principles including the Toyota Production System.
- Familiarity with good manufacturing processes and applicable regulatory issues/compliance.
- Demonstrated flexibility in a very dynamic work environment.

Major Accountabilities

- Subscribe to and actively support a safe work environment.
- Ownership of and accountability for assigned projects, plant areas and/or processes.
- Effective oversight and supervision of designated plant personnel and/or outside contractors.
- Implement and sustain scientific and engineering rigor as well as compliance in regard to safety and manufacturing processes.
- Support of Operations VP in regard to special assignments and projects to maximize operations growth and effectiveness.

- Represent Thatcher Company and/or Thatcher Pharmaceutical Company in a comprehensively professional manner by developing a thorough knowledge of Thatcher products and processes.

What's In It for You?

- **Competitive salary (DOE and Skill Level)**
- **Benefit package including health, accident, life, and dental insurance plans.**
- **Significant profit sharing/retirement plan which is 100% employer paid.**
